Relevant Experience

Software Developer

Trade Dynamics Consulting Int'l Inc • Aug 2023 — Present

- Led the end-to-end development of an asset management system, leveraging PHP for backend workflows and JavaScript to deliver an intuitive and efficient user experience
- Rolled out Multi-Factor Authentication (MFA) for system login, significantly strengthening application security
- Lead a team of developers to plan priorities for different projects to meet deadlines on time
- Contributed to frontend projects utilizing JavaScript frameworks focusing on UX enhancements for consumer-facing products
- Independently designed and delivered a full-featured asset management platform, utilizing PHP to build robust backend logic and JavaScript with Material UI to craft a modern, responsive frontend interface
- Contributed to improving internal automation by debugging and enhancing a Discord bot built with Node.js, ensuring reliable delivery of system notifications to team Discord channels
- Continuously enhance system stability by troubleshooting issues, refining existing functionalities, and deploying new product features across various projects

Web Developer

EACOMM Corporation • July 2022 — Aug 2023

- Developed backend functionality for the in-house Salesforce web application designed for fast-moving consumer goods, enhancing task management and identifying solutions to bugs
- Executed frontend implementations using ReactJS aimed at improving consumer product interfaces
